

Turning Mirrors

90 degree C-mount mirror assemblies

Turning Mirrors are available for both the Pika II and Pika NIR Hyperspectral imagers allowing unique mounting and space-saving configuration.

Use

Resonon turning mirrors allowing Pika II and Pika NIR imagers to be mounted 90 degrees to the desired field of view. These mirror assemblies enable a wide variety of mounting and packaging options on both manned and un-manned aerial platforms.

Interface

The turning mirror assembly fits over standard C-mount objective lenses. The compact turning mirror assembly is easily installed with a provided adapter set.

Weight

86 grams NIR
64 grams Pika II
